Industrial Supply Grilles

TIG

TIG

STEEL FRAME
ALUMINUM / STEEL BLADES

The TIG is a commercial and industrial supply grille that is great for conditioned spaces that require frequent changes in airflow pattern. The TIG has two sets of air pattern blades that provide double deflection air patterns. The front blades are individually adjustable and the rear blades are gang operated and include an adjustment handle. The adjustment handle can be set with a pole (provided by others) from the floor which eliminates the need for a ladder.

FEATURES

- 20 gauge steel frame with steel rear blades and extruded aluminum construction front blades
- Individually adjustable front blades
- Gang operated rear blades with adjustment handle
- Countersunk screw holes in frame
- Standard sizes: 10"x6" to 40"x36"
- Horizontal or vertical front blades
- Standard finish is white (WH)

Available Sizes in One Piece

Model	Minimum	Maximum
TIG	10x6	40x36
2" increments of width and height. Multiple sections furnished for sizes greater than maximum.
