

**SG900L**

# SECURITY GRILLES

## SG900

### ALUMINUM

The SG900 series lattice face plates are designed for minimum security applications and offer an economical alternative for secure areas. The aluminum construction makes them ideal for areas of high humidity and moisture. They have the same dimensions as the Tuttle & Bailey A50, A60, A70, and A80 series grilles (duct plus 1-3/4" overall dimension) so the SG900 can be field assembled to the grille to provide a secured air passage. The heavy construction offers a reliable duct barrier and provides maximum free area.

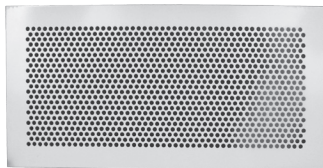

\*Note: Security screws are provided by others.

### FEATURES

- SG900L: lattice face plate, 1/8" aluminum, 13/16" x 13x16" square holes spaced on 1" centers with 3/16" fret, 66% free area
- SG900P: perforated face plate, 1/8" aluminum, 5/16" diameter round holes on 7/16" staggered centers
- Aluminum construction
- Standard finish is white (WH)

### ACCESSORIES

- Countersunk screw holes, 3/16" diameter
- Straight screw holes, 3/16" diameter
- Aluminum opposed blade damper (ADFO - face operated) is welded to 1" sleeve
- Aluminum plaster frame (A45)
