## DSQ1

### OVERVIEW

The DSQ1 is a rectangular displacement diffuser with a one-way discharge pattern designed for stair riser applications. It supplies a large volume of air at low velocities into the occupied zone.

This model can contribute toward achieving LEED EA Credit 1: Optimize Energy Performance; IEQc2: Increased Ventilation; and IEQc7.1: Thermal Comfort - Design.

### FEATURES

- Rectangular displacement diffuser with 1-way air discharge pattern for flush mount applications in the risers of steps or stairs
- Supplies air at low velocity into the occupied zone
- Material is galvanized steel and aluminum
- Standard finish is WH white (powdercoat)
