Electronically Controlled VAV Diffuser

DCVH

DCVH

STEEL

The Tuttle & Bailey DCVH electronically controlled variable air volume diffuser provides individual comfort by allowing users to choose their own desired comfort level. The diffuser effectively regulates the amount of supply air into the space and uses a wall-mounted thermostat to achieve true VAV control in the heating mode, as well as the cooling mode.

FEATURES

- Digital wall mounted thermostat control
- Automatic changeover from heating to cooling is standard
- Available for surface mount or Lay-in applications
- Unitary stamped seamless backpan with removable face plate
- Integral modulating disk to regulate volume
- Standard finish is white (WH)

Available Sizes
