

# SECURITY GRILLES

## SDBS

SDBS

### STEEL

The SDBS is a security duct barrier with a sleeve that is designed for use in wall openings separating a secure and non-secure area. It also is used to restrict passage through duct work and can be used for wall or roof barriers. Duct connections can be quickly made at both ends of the sleeve which makes the SDBS a popular installation in security walls.

### FEATURES

- Bars: 3/4" diameter round solid steel bars with maximum opening of 6"
- Sleeve: 1/4" steel plate stitch welded at seams
- Steel construction
- All welded construction
- Two angle frames: 1-1/2" x 1-1/2" x 3/16" steel angle iron welded at corners (shipped loose and unpainted for field mounting)
- Standard finish is white (WH)
