Defrost Controller Installation Guide

 ${\bf Controller\ for\ refrigerated\ cabinets,\ under counters\ and\ is lands,\ with\ energy-saving\ strategies}$

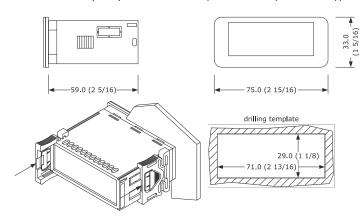

- Controller for normal temperature units
- Power supply for TC3221N5x: 115 VAC
- Power supply for TC3221N7x: 230 VAC
- Cabinet probe with a negative temperature coefficient (NTC), 10,000 ohm at 77°F Door switch or multi-purpose input
- TTL MODBUS® subordinate port for Building Management System (BMS)
- Cooling or heating operation

MEASUREMENTS AND INSTALLATION

rements in mm (inches). Fit the controller to a panel with the snap-in brackets supplied.

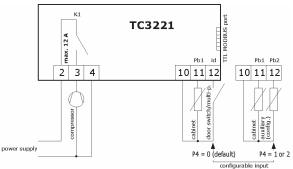

INSTALLATION PRECAUTIONS

- Ensure that the thickness of the panel is between 0.8 mm and 2.0 mm (1/32 in. and 1/16 in.)
- Ensure that the working conditions are within the limits stated in the $\emph{TECHNICAL}$ SPECIFICATIONS section.
- Do not install the device close to heat sources, equipment with a strong magnetic field, in places subject to direct sunlight, rain, damp, excessive dust, mechanical vibrations
- In compliance with safety regulations, install the device correctly to ensure adequate protection from contact with electrical parts. Fix all protective parts in such a way so as to need the aid of a tool to remove them.

2 ELECTRICAL CONNECTION

Important

Use cables of an adequate wire gauge for the current running through them. To reduce any electromagnetic interference, connect the power cables as far away as possible from the signal cables

- Power supply for TC3221N5x: 115 VAC.
- Power supply for TC3221N7x: 230 VAC.

PRECAUTIONS FOR ELECTRICAL CONNECTION

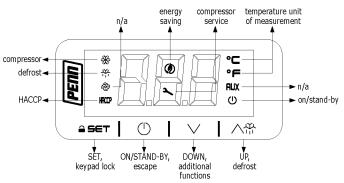

- If you use an electrical or pneumatic screwdriver, adjust the torque to a maximum of 0.5 N•m (4 in. lb).
- If you move the device from a cold to a warm place, the humidity may cause condensation to form inside. Wait an hour before you switch on the power.
- $\label{eq:make_sure_that} \mbox{Make sure that the supply voltage, electrical frequency, and power are within the set}$ limits. See TECHNICAL SPECIFICATIONS.
- Disconnect the power supply before you do any type of maintenance.
- Do not use the device as safety device.
- For repairs and further information, contact the Penn sales network.

- Follow the instructions in MEASUREMENTS AND INSTALLATION to install the controller. Power up the device as shown in ELECTRICAL CONNECTION and an internal test runs. The test normally takes a few seconds. When it finishes the display switches off.
- Configure the device as shown in Table 6.1 in the section SETTINGS.

	i oi iecc	mineraea comiguration parameters for	mist time use, see the following table.
PAR.	DEF.	PARAMETER	MIN MAX.
SP	32	Setpoint	r1 to r2
P2	1	Temperature unit of measurement	0 = °C 1 = °F

- Check that the remaining settings are appropriate. See CONFIGURATION PARAMETERS Disconnect the device from the mains.
- Make the electrical connection as shown in *ELECTRICAL CONNECTION* without powering
- Power up the device.

4 USER INTERFACE AND MAIN FUNCTIONS

4.1 Switching the device on or off

If POF = 1, tap the ON/STAND-BY key for 4 s.

If the device is switched on, the display shows the P5 value, cabinet temperature by default. If the display shows an alarm code, see $\ensuremath{\textit{ALARMS}}.$

LED	ON	OFF	FLASHING
*	Compressor on	Compressor off	- Compressor protection active - Setpoint setting active
*	Defrost active	-	Dripping active
НАССР	Saved Hazard Analysis and Critical Control Point (HACCP) alarm	-	New HACCP alarm saved
(Energy saving active	-	-
2	Request for compressor service	-	Settings active Access to additional functions active
°C/°F	View temperature	-	Overcooling or overheating active
(I)	Device off	Device on	Device on or off active

If 30 s elapse and you do not press the keys, the display shows the "Loc" label and the keypad locks automatically.

Unlocking the keypad

Tap any key for 1 s. The display shows the label " $\boldsymbol{UnL}''.$

4.3 Setting the setpoint

Check that the keypad is not locked.

1.	≙ SET	Tap the SET key.
2.	₹	Tap the UP or DOWN key within 15 s to set the value within the limits $r1$ and $r2$.
3.	_ ≙SET	Tap the SET key or do not operate for 15 s.

Activating manual defrost (if r5 = 0, default)

Check that the keypad is not locked and that overcooling is not active.

Tap the DOWN key.

Tap the UP key for 2 s.

If P4 = 1, the defrost activates if the evaporator temperature is lower than the d2 threshold.

4.5 Silencing the buzzer (if A13 = 1)

Tap any key.

ADDITIONAL FUNCTIONS

Activating or deactivating the overcooling, overheating, and manual energy saving

Check that the keypad is not locked.

FUNCTION	CONDITION	CONSEQUENCE
Overcooling	r5 = 0, $r8 = 1$ and defrost	The setpoint becomes "setpoint -
	not active	r6", for the r7 duration
Overheating	r5 and r8 = 1	The setpoint becomes "setpoint +
		r6", for the r7 duration
Energy saving	r5 = 0 and r8 = 2	The setnoint becomes "setnoint +

r4", at maximum for HE2 duration

5.2 Navigating the additional functions menu Before you begin, check that the keypad is not locked

1.	FNC	To access the additional functions menu, tap the DOWN key for 4 s.
2.	√ FNL V	To navigate to a label, tap the UP or DOWN key within 15 s.
3.	≙SET	To select a label, tap the SET key.
4.		If you cannot edit the parameter, the value displays. If you can edit the parameter, tap the UP or DOWN key to navigate to the value that you want.
5.	≙SET	To set the parameter value, tap the SET key.
6.		To exit the procedure, tap the ON/STAND-BY key, or do not operate the controller for 60 s.

5.3 Additional functions menu

Use the additional functions menu to cycle through the labels in the following table. LABEL VALUE DESCRIPTION

LS		View HACCP alarm information				
	AL	Low temperature alarm information				
	AH	High temperature alarm information				
	id	Door switch alarm information				
	PF	Power failure alarm information, available when you connect a TCIF23TSX accessory				
rLS		Delete HACCP alarm information				
	149	Command to delete HACCP alarm information				
CH rCH		View compressor functioning hours in hundreds				
		Delete compressor functioning hours				
	149	Command to delete compressor functioning hours				
nS1		View compressor start-up number in thousands				
Pb1		Cabinet temperature				
Pb2		Auxiliary temperature, if P4 = 1 or 2				
PrJ	, and the second	View the project number				
rEU		View the firmware revision				

Alarm information example

The following table shows examples of alarm information for a high temperature alarm. LABEL SAMPLE DESCRIPTION

	VALUE	
	8.0	The critical value was 8.0°F or 8.0°C. The critical value can be cabinet
		temperature or calculated product temperature (CPT).
Sta		The time at which the alarm signaled, for example:
		26 March 2015 at 16:30
		Sta is available when you connect a TCIF23TSX accessory.
	y15	2015
	n03	March
	d26	26 March 2015
	h16	16:xx
	n30	16:30
dur		The alarm duration, for example 1 h 15 min
	h01	1 h
	n15	1 h 15 min

6	SETTINGS	
6.1	Setting configurat	ion parameters
1.	aset	Tap the SET key for 4 s. The display shows the label "PA".
2.	aset	Tap the SET key. The display shows the label "PAS".
3.	√\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\	Tap the UP or DOWN key within 15 s to set the password.

	1	
4.	_ aset	Tap the SET key or do not operate for 15 s. The display shows the label "SP".
5.	₹	Tap the UP or DOWN key to select a parameter.
6.	aset	Tap the SET key.
7.	₹	Tap the UP or DOWN key within 15 s to set the value.
8.	≙SET	Tap the SET key or do not operate for 15 s.
9.	aset	Tap the SET key for 4 s, or do not operate for 60 s , to exit the procedure.

6.2 Setting the date, time, and day of the week

Note: This feature is available if you connect a TCIF23TSX accessory

	.84.	Important
	Q,	Do not disconnect the device from the mains within 2 minutes of setting the time and
	~	day of the week.
l		,

Check	that	the	keypad	li	s	not	loc	ked	
	1 -					- 1			

PARAMETERS.

7 CONFIGURATION PARAMETERS

1.	`	✓	Tap the DOWN key for 4 s.
2.	f	<u></u> ^₩ _•	Tap the UP or DOWN key within 15 s to select the label "rtc".
3.		5€T	Tap the SET key. The display shows the label "yy" followed by the last two figures of the year.
4.	f		Tap the UP or DOWN key within 15 s to set the year.
5.	Repea	t actions 3. a	and 4. to set the next labels.
	LAB.	DESCRIPTION	ON
	n	Month (01 t	to 12)
	d	Day (01 to	31)
	h	Time (00 to	23)
	n Minute (00		t - FO)
	п	Minute (00	to 59)
6.	1.	FET	Tap the SET key. The display shows the label for the day of the week.
6. 7.	1.	<u> </u>	Tap the SET key. The display shows the label for the day of the
	1.	∋∈ ⊤	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	<u>a</u> 9	AM I	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	V LAB.	DESCRIPTION	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	LAB. Mon tuE UEd	DESCRIPTION Monday Tuesday Wednesday	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	LAB. Mon tuE	DESCRIPTION Monday Tuesday	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	LAB. Mon tuE UEd	DESCRIPTION Monday Tuesday Wednesday	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	LAB. Mon tuE UEd thu	DESCRIPTION Monday Tuesday Wednesday Thursday	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.
	LAB. Mon tuE UEd thu Fri	DESCRIPTION Monday Tuesday Wednesday Thursday Friday	Tap the SET key. The display shows the label for the day of the week. Tap the UP or DOWN key within 15 s to set the day of the week.

Restoring the default factory settings and storing customized settings as 6.3

Tap the ON/STAND-BY key to exit the procedure beforehand.

Important Check that the factory settings are appropriate; see the section ${\it CONFIGURATION}$

When you store customized settings, you overwrite the default

- 1				
	1.	≙ SET		Tap the SET key for 4 s. The display shows the label "PA".
	2.	2 SET		Tap the SET key.
	3.	f	<u>^</u> # •	Tap the UP or DOWN key within 15 s to set the value.
		VAL.	DESCRIPTION	DN
-		149	Restores the	e default factory settings
		161	Stores custo	omized settings as default
-	4. 25ET		БЕТ	Tap the SET key, or do not operate for 15 s. The display shows the label "dEF" when you set the value "149" or the label "MAP"
				when you set the value "161".
	5.	<u> </u>	SET	Tap the SET key.
6. V			Tap the UP or DOWN key within 15 s to set "4".	
	7.	25	∋ ∈⊤	Tap the SET key or do not operate for 15 s. The display shows "" flashing for 4 s, then the device exits the procedure.
	8.	Interru	upt the power	supply to the device.
9.		aset		Tap the SET key 2 s before step 6. to exit the procedure beforehand.

COD.	DESCRIPTION	RESET	REMEDIES
Pr1	Cabinet probe alarm	Automatic	- Check P0
Pr2	Auxiliary probe alarm	Automatic	- Check probe integrity
			- Check electrical connection
rtc	Clock alarm	Manual	Set date, time, and day of the week
AL	Low temperature alarm	Automatic	Check AA, A1, and A2
АН	High temperature alarm	Automatic	Check AA, A4, and A5
id	Open door alarm	Automatic	Check i0 and i1
PF	Power failure alarm	Manual	- Tap any key - Check electrical connection
сон	High condenser temperature warning	Automatic	Check C6
CSd	High condenser temperature alarm	Manual	- Switch the device off and on - Check C7
iA	Multi-purpose input alarm	Automatic	Check i0 and i1
Cth	Compressor thermal switch alarm	Automatic	Check i0 and i1
th	Global thermal switch alarm	Manual	- Switch the device off and on - Check i0 and i1
dFd	Defrost timeout alarm	Manual	- Tap any key - Check d2, d3 and d11

10 TECHNI	ICAL SPECIFICATIONS		
Purpose of the	control dovice	Function controller	
	f the control device	Built-in electronic device	
	the control device		
Container		Black, self-extinguishing	
Category of he	at and fire resistance	D	
Measurements		2 15/16 in. x 1 5/16 in. x 2 5/16 in. (75 mm	
		x 33 mm x 59 mm)	
Mounting meth	nods for the control device	Fit the controller to a panel with the snap-in	
		brackets supplied	
Degree of prot	ection provided by the	IP65 in front	
covering			
Connection me	thod		
Fixed screw terminal blocks for wires up to		Micro-MaTch® connector	
2.5 mm ²			
Maximum pern	nitted length for connection cabl	es	
Power supply: 32.8 ft (10 m)		Analog inputs: 32.8 ft (10 m)	
Digital inputs:	32.8 ft (10 m)	Digital outputs: 32.8 ft (10 m)	
Operating tem	perature	From 32°F to 131°F (from 0°C to 55°C)	
Storage tempe	rature	From -13°F to 158°F (from -25°C to 70°C)	
Operating hum	idity	Relative humidity without condensate from	
		10% to 90%	
Pollution status	s of the control device	2	
Compliance			
United States	cURus Recognized; File SA516 CCN SDFY2; FCC Compliant to CFR47, Part 15, Subpart B, Class A limits		
Canada	cURus Recognized; File SA516 to Canadian ICES-003, Class A	CCN SDFY8; Industry Canada (IC) compliant limits	
Europe	CE Mark – Johnson Controls declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC
