

# RP-600 PG2

## Installation Instructions

### Wireless Repeater for PowerG Systems

## 1. Introducing RP-600 PG2

The RP-600 PG2 is a range extender designed to relay digital data between wireless PowerG control panel devices and a PowerG control panel. Repeaters are required when the control panel is beyond the range of at least some of the devices and is therefore incapable of receiving transmissions directly.

For the complete RP-600 PG2 Installer Guide, refer to **D- 302415** at <http://www.visonic.com/download-center>.

Alternatively, contact us at [info@visonic.com](mailto:info@visonic.com) to request the complete version of the installation guide.

## 2. Mounting the Device

1. Install the repeater where good communication is assured with the target receiver and with the transmitters deployed in the repeater's coverage area.
2. Mount the repeater as high as possible above the floor and far from metal chimneys, large metal cabinets, metal doors and reinforced concrete walls.
3. Insert the screw to secure the cover with the base.

**Attention!** For Europe, the transformer has to be CE compliant and power limited.

**Note:** The manufacturer of the transformer is **ORIENTAL HERO**, model no. **OH-35048AT** rated 8.6VAC 0.33A. For UL installations (UL) the plug-in transformer must have restraining means. For Canada (CUL), it cannot have restraining means

## 3. Enrollment of the Device

Refer to the PowerMaster panel's Installer Guide.

To enroll the device enter the Installation menu and do as follows:

1. From the Installation menu, select **02:ZONES/DEVICES** and click **OK**.
2. Select **ADD NEW DEVICES** and click **OK**. Panel displays: <ENROLL NOW or ENTER ID:xxx-xxxx>

3. Enter **ID:XXX-XXXX** (the number of the device and re-test until a "good" or "strong" signal strength is that is displayed on the label), Or press the **Enroll** button in the device.

The display shows the device details and first available free Zone/Device number. For example: "Z01:Motion Sensor > ID No. 120-1234" or "K01:Keyfob / S01:Siren". The display depends on the type of enrolled device.

4. To change the Zone/Device number, click the arrow button or type the zone number and then click **OK**.
5. Select one of the following options:
  - Continue to configure the device
  - Select **⏏** and then click **OK** to exit

## 4. Service Messages

Service transmissions include five types of event codes:

- **AC fail:** recharging stops and backup battery takes over
- **Low battery**
- **End of life:** battery is depleted; reported shortly before device shut down.
- **Tamper:** reported upon occurrence
- **Supervision**

**Caution!** Risk of explosion if battery is replaced by an incorrect type. Dispose of used battery according to manufacturer's instructions.

**Note:** Service personnel should replace battery.

## 5. Local Diagnostics Test

Before testing, separate the base from the cover. The following table indicates the received signal strength.

LED response	Reception
Green LED blinks	Strong
Orange LED blinks	Good
Red LED blinks	Poor
No blinks	No communication

**Important!** Reliable reception must be assured.

Therefore, "poor" signal strength is not acceptable. If you receive a "poor" signal from the device, re-locate it

and re-test until a "good" or "strong" signal strength is received.

For detailed Diagnostics Test instructions refer to the control panel Installer Guide.

For UL/CUL installations, the test result must be "Strong".

## 6. Testing Procedure

Press the self-test button once and release it. The red LED and then the green LED switches ON and then OFF to indicate that the repeater is now fully operational. After 2 seconds the LED blinks 3 times.

## 7. Compliance With Standards

The RP-600 PG2 complies with the following standards:
